Digital Transformation
is the **integration** of
digital technology

Digital Transformation, this word has fuelled a strategic change in the IT landscape today across the world. There was a discussion on this before but with the current advent in emerging technologies such as Artificial Intelligence, Machine Learning, Blockchain Technology etc has been harnessing this innovative idea into a well backed up reality. Well, **Digital Transformation is the integration of digital technology into the areas of business defining how they operate** and add value to their communication with their customers.

As per the recent Global Digital Transformation Market Report, by Research and Markets, the global digital transformation market size is expected to grow at a compound annual growth rate of 21.1% to reach USD 1548 billion in just few years from now, compared to USD 594 billion today which is almost 3 times the size, which shows the impact it is about to have in the Global technology arena. And the technology component is segmented into, Cloud Computing, Data Engineering and analytics, Cyber security, AI and Mobility. The key elements anticipated to propel the adoption of digital transformation technology are the rise of expenditure on marketing efforts, branding expenses and adjusting to changing consumer intelligence grounds.

Revotyx is a vibrant, right-sized company, focusing on Enterprises of varied sizes, including fortune 500 organizations. Empowered by dynamic and customer-centric team with acquired domain expertise across all industries, we offer efficient IT infrastructure solutions, Enterprise Applications Management and Business Intelligence services.
